DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Charles Prescott on 13 December 2006.

The application has been amended as follows:

- In the specification, on page 5 lines 18-19, the phrase "Neoprene having a thickness of 1/8" and a durometer reading of approximately 60" has been replaced with --Neoprene having a thickness in the range of about 1/8" and a durometer reading of in the range of about 60--. These changes are supported by the original claims.
- In the specification, on page 6 lines 3-5, the phrase "The preferred size of the flexible shield 12 is approximately as shown in actual size in the drawings, i.e. having a width of 5" and an overall height of 4 5/8". " has been replaced with --The preferred size of the flexible shield 12 incorporates a height and width being about 5" and more specifically the height being 4 5/8" and the width being 5". This change is supported by the original claims.
- In claim 15 lines 9-10, the phrase "through a central portion of said shield" has been deleted.

Art Unit: 3724

- In claim 15 line 19, the phrase "along the upright central portion thereof" has been deleted.
- In claim 20, the phrase "has a thickness of about 1/8" " has been replaced with -- has a thickness in the range of about 1/8"--

Allowable Subject Matter

2. Claims 15-21 are allowed.

3. The following is an examiner's statement of reasons for allowance: Claims 15-21 are allowable because of the shield apparatus with an elongated notch extending downward, a mounting aperture above the lower margin to receive a threaded end of the rear blade tensioning support, and a threaded nut engaging with a threaded end of the rear blade tensioning support and against a portion of the shield surrounding the aperture as set forth in the claims. Cited prior art disclose hacksaws with shields but do not disclose the specific structure with regards to attaching the shield to the hacksaw frame. None of the prior art cited discloses an apparatus that incorporates the use of a shield with an elongated notch extending downward, a mounting aperture above the lower margin to receive a threaded end of the rear blade tensioning support, and a threaded nut engaging with a threaded end of the rear blade tensioning support and against a portion of the shield surrounding the aperture to protect a users hand. Therefore, in view of what has been stated above, the claims are allowable over the art of record.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
